Installation Emulator For MERCEDES ATEGO Euro 6

MERCEDES ATEGO EURO 6 ADBLUE REMOVE EMULATOR INSTALLATION

You must locate the ACM Module and remove the socket.

The cable should be installed as shown in the picture below.

Emulator White cable (CAN H) -----> Atego vehicle socket 10 pin (CAN H)

Emulator Brown cable (CAN L) -----> Atego vehicle socket 20 pin (CAN L)

Emulator Red (+) -----> Atego vehicle Positive (+) Cable

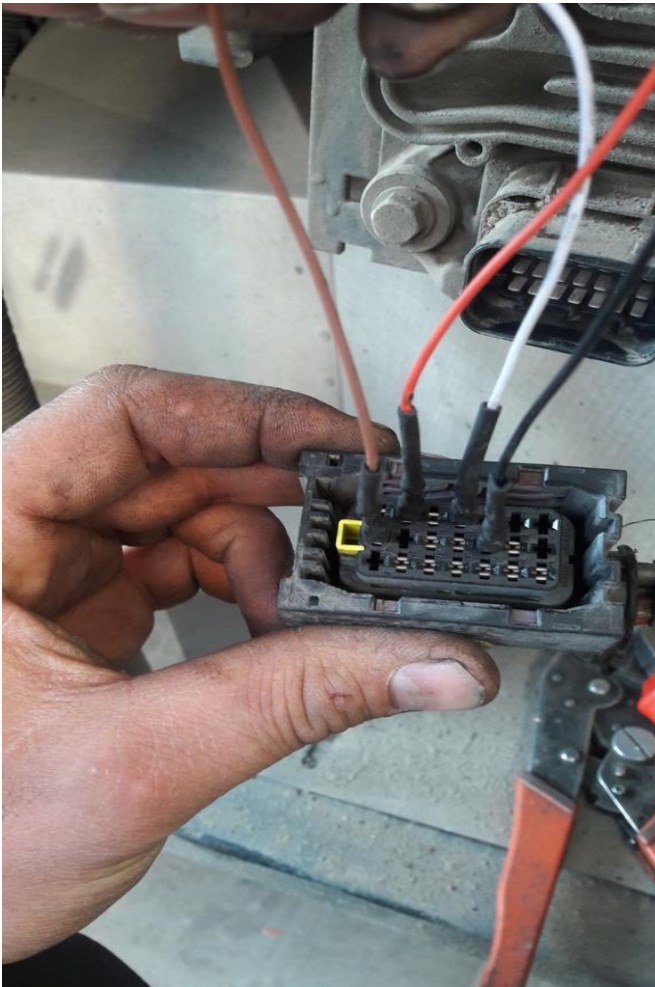

Emulator black (-) -----> Atego vehicle GND (-) cable

AFTER INSTALLATION, YOU MUST REMOVE ERRORS WITH FAULT DETECTING DEVICE.

The **Mercedes DTC fault code eraser** can also be used to erase the fault in your Atego vehicle.

You will not mount the socket back into the ACM module. Isolate the Atego ACM module without damage.

You do not need to remove any insurance.

You should definitely cancel the DPF after installing the Adblue Removal Emulator!
