ADBLUE EMULATOR VOLVO

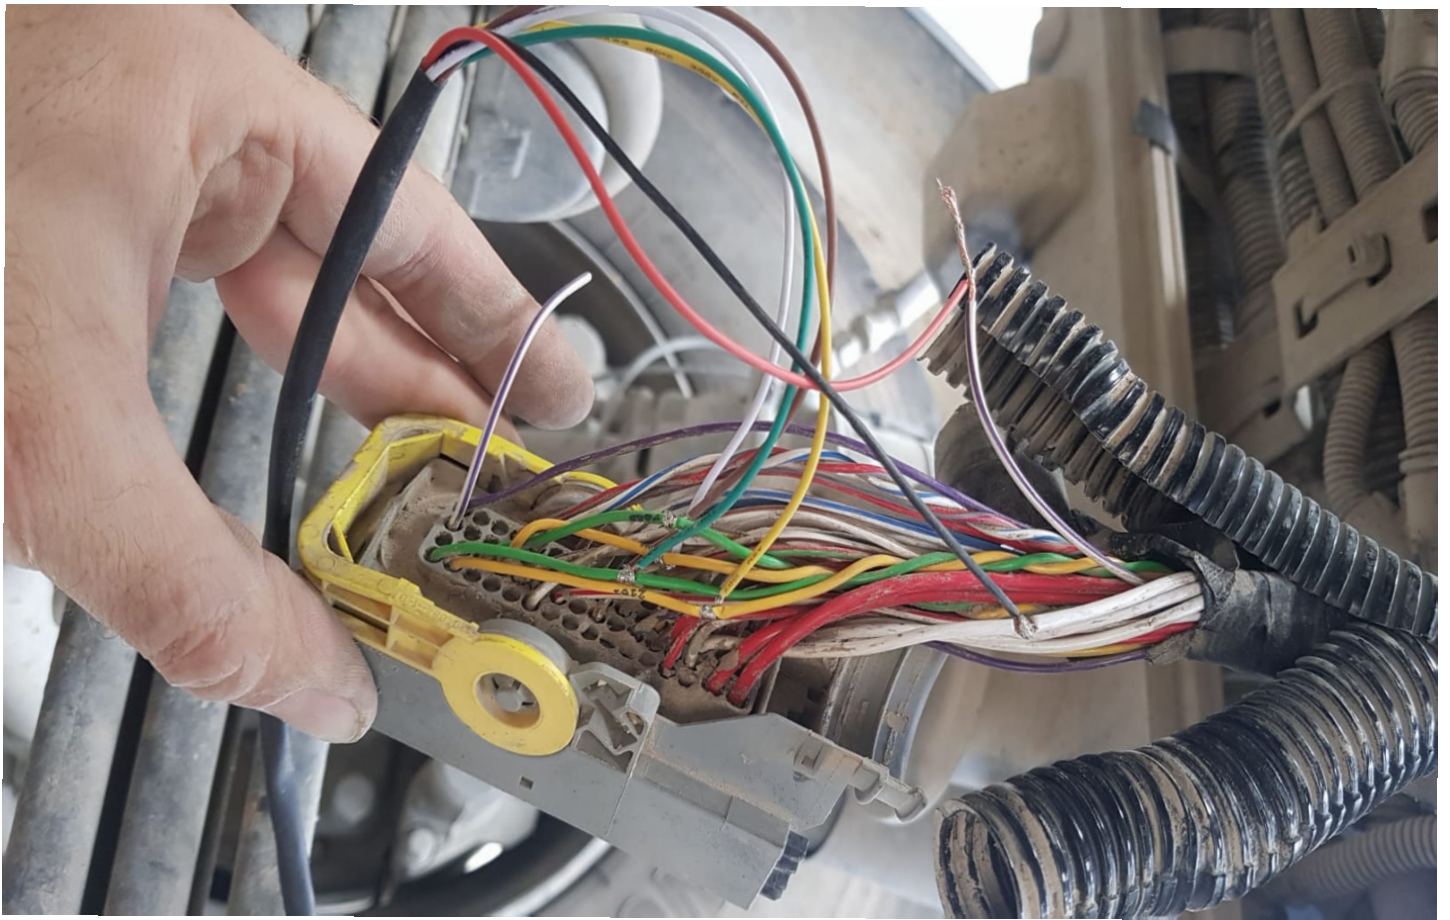

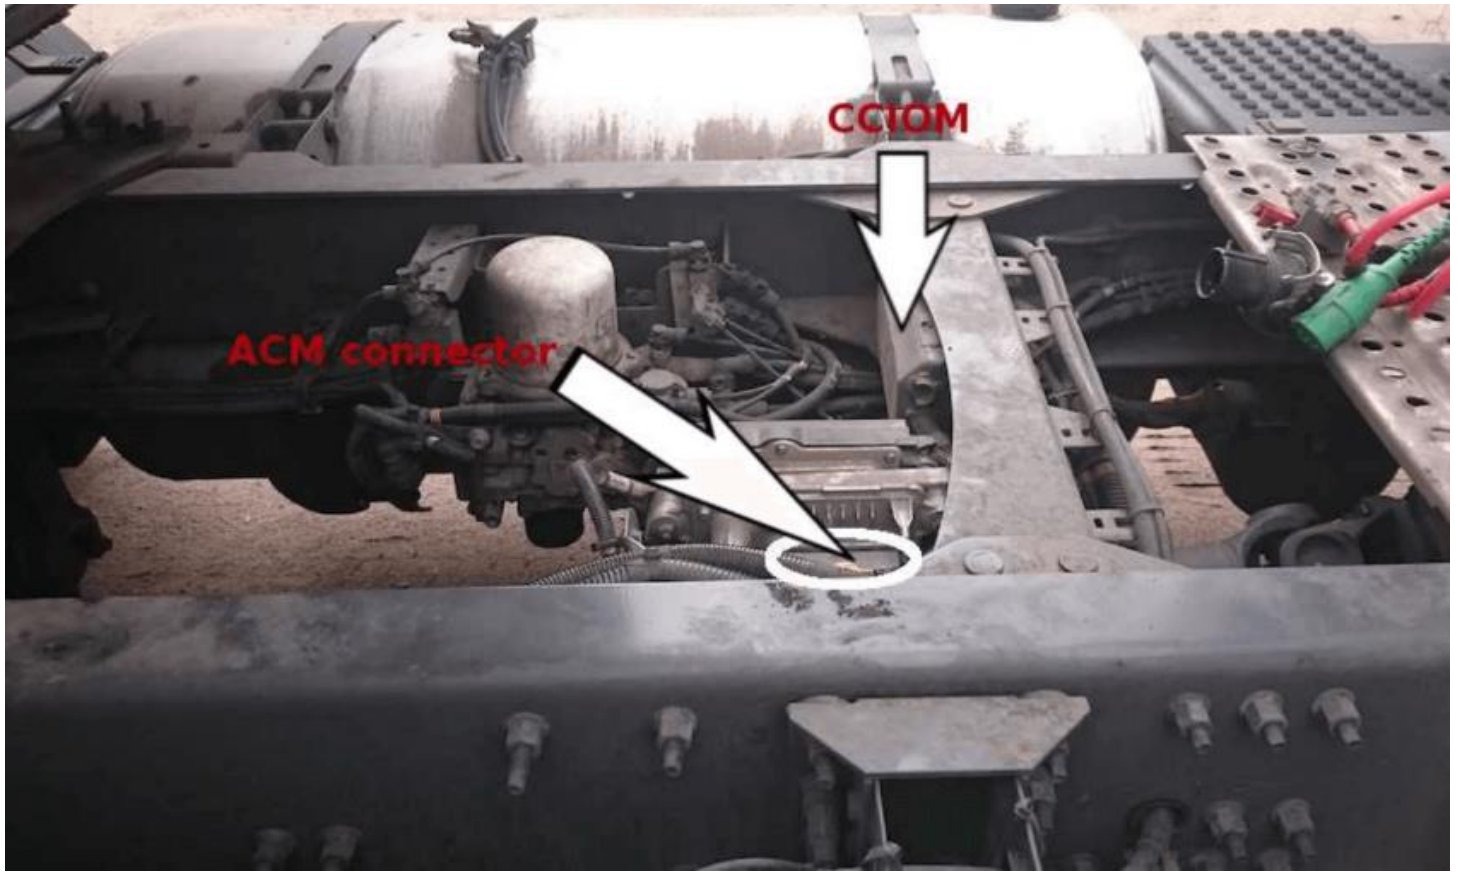

EURO 6

 www.canbusemulator.com/en

 +90 530 937 46 36

 [erenakarsubasi](https://t.me/erenakarsubasi)

Socket	Emulator
1. pin Green ----->	To Green Cable
5. pin Yellow ----->	To Yellow cable
10. pin Green ----->	To the Brown cable
14. pin Yellow ----->	To White cable
55. pin White (GND) ----->	Black cable (-)
3. pin White / Purple (+) ----->	Red cable (+)

NOTE: Only cable 2020 in pin 3 will be cut and emulator (red cable) connected to the vehicle side.

Other cables will be connected in parallel.

After the installation is finished, all error codes must be deleted. "DTC ERASER EURO6 VOLVO" will help you to clear errors.

NOTE: Removing the DPF filters will be healthier. Otherwise, filters should be cleaned frequently by regeneration method.

You should definitely cancel the DPF after installing the Adblue Removal Emulator!
