VMAX Emulator Installation

TAKOGRAF

VEHICLE SIDE

EMULATOR

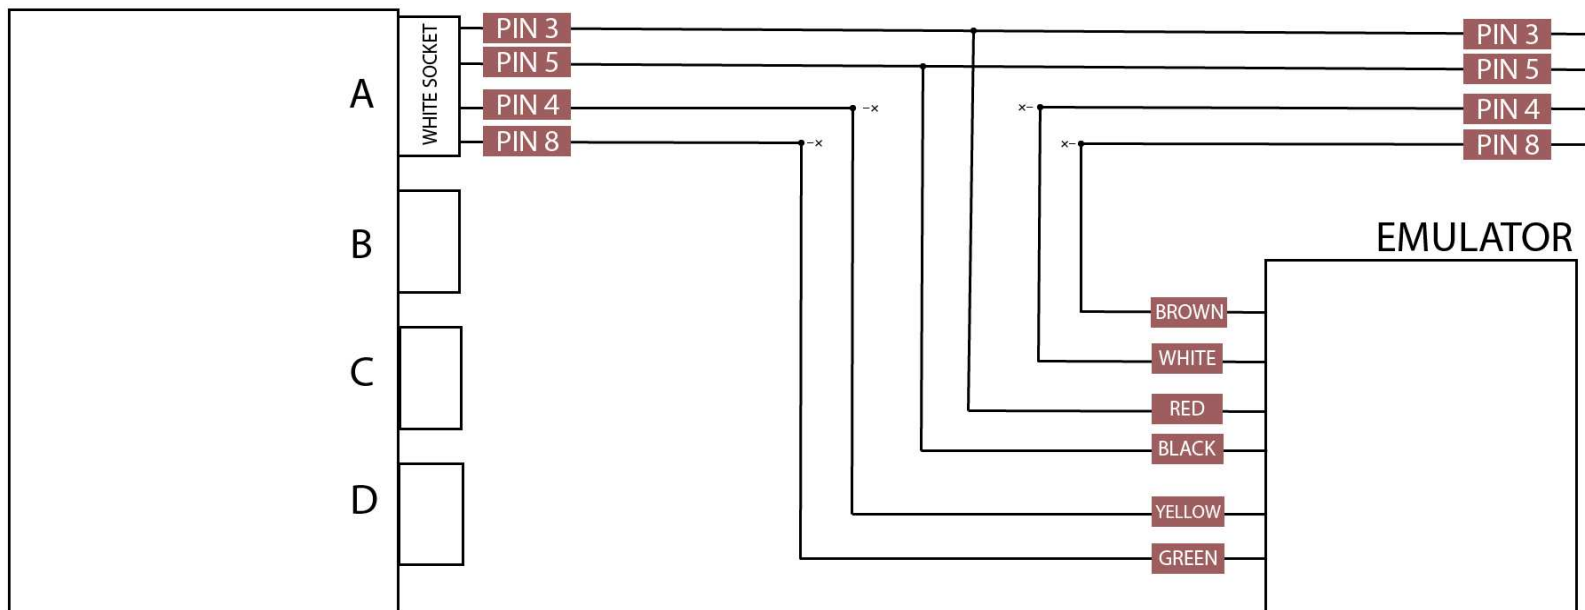

- 1- Turn off the ignition.
- 2- Turn off the main switch.
- 3- Disconnect the white socket on the tachograph side.
- 4- Connect the male socket on the emulator to the location of the socket you removed on the tachograph side.
- 5- Connect the female socket on the emulator side to the white socket from the vehicle that you removed on the tachograph side.
- 6- If there is an error after assembly, you can erase your errors with the '[Can-Bus DTC Eraser](#)' tool.

We recommend that you check the battery of the tachograph device before installation.

VMAX Emulator Installation -without socket

TAKOGRAF

VEHICLE SIDE

The ignition must be off during installation.
Errors should be deleted after the installation.

We recommend that you check the battery of the tachograph device before installation.
