CLAAS ADBLUE EMULATOR INSTALLATION

- | | |
|------------------------------|---------------------------------------|
| Brown (Emulator side) | > Pin 20 on the socket side |
| Red (Emulator side) | > Pin 16 on the socket side |
| White (Emulator side) | > Pin 10 on the socket side |
| Black (Emulator side) | > Pin 8 on the socket side |

After the process, you can pull out the socket or cut Pin 16 and connect the emulator to the vehicle side with the red cable and plug the socket.

You should remove the DPF After installing the Adblue cancellation emulator.
