Vehicle must be original.

1- You need do regeneration for exhaust.

2- You need reset function (SCR reset, DPF reset, learned Noxvaluesreset,)

3- Emulator will be installed

- You don't need to cut the CAN line cables on the DCU, just pull the socket.
- Pull out the outlet NOx sensor.
- Pull out the DPF differential pressure sensor.

- Also, you need to connect the DPF differential pressure sensor ground cable with the emulator ground cable.
