Overaasen (Mercedes Engine) ADBLUE EMULATOR ASSEMBLY

Brown (Emulator side) > Pin20 on socket side

Red (Emulator side) > Pin16 on socket side

White (Emulator side) > Pin10 on socket side

Black (Emulator side) > Pin8 on socket side

After the procedure, the socket should be left unplugged or the relevant SCR fuse should be pulled.

After installing the Adblue cancellation emulator, you have to remove the DPF.
